

We are delivering Online Training with Zoom

ON LINE TRAINING VIA VIDEO CONFERENCING

ZOOM is a platform that we use to conduct online health and safety training.

These courses allow delegates to interact with the tutor alternating between themselves and the presentation to ask questions and have these answered in real time.

Delegates will need to download the Zoom software from the App Store or internet to attend one of these courses.

The employer will need to agree with us a date(s) for the training, who is attending and we will give them the link and password to send out the invitations to the delegates.

The courses that we deliver under this platform with a minimum of 4 delegates and a maximum of 10 delegates are;

CITB - Site Safety Plus Courses

SMSTS 5 Day
SMSTS 2 Day Refresher
SSSTS 2 Day
SSSTS 1 Day Refresher
1 Day Health and Safety Awareness

IOSH Courses

Safety for Directors in Housebuilding & Developments
IOSH Working Safely

A number of Select Health and Safety courses (CDM Awareness, Manual Handling & Fire coordinator etc.) are also available to be undertaken via Zoom.

Note; Zoom training costs vary in price per delegate depending on the course including certification.
